To: Auburn Lakes / Oakmont Public Utility Residents

As the designer of pool improvements and exercise facilities remodeling, this is meant to apologize for the lack of shade at the pool deck. The new pavilion is to provide much needed shade and four large 20 foot diameter umbrella were to be installed with the pool. The umbrellas were to replace the wood trellis and were to be installed shortly after the pool opening.

We made a mistake in assuming the umbrellas had been ordered. We did not adequately follow through on the order and relied on the supplier's email stating the order had been placed. These are custom made umbrella that are being manufactured out of state. We did not learn until this past Thursday that the local representative was only then processing the order. Unfortunately, the umbrella will probably not be installed for another four weeks from today.

Please be aware that the Oakmont P.U.D. Board of Directors is pushing to get the project completed for the resident's enjoyment and enhancement of property values.

Please accept this apology from Sweitzer + Associates and know that we are working to have that facility completed and functioning for the benefit the Auburn Lakes Community.
